

# Laser Engraving

Laser engraving utilizes a beam of focused light to remove a thin outer layer of the substrate in the form of your artwork. This process leaves a clean, uniform, and permanent mark.

Imprint zone - keep all artwork in this space

1.75 in"

0.3125 in"

## Tips:

- Use Flat black and white vector art, with no opacity or gradations.
- File type: .PDF, .EPS, or .AI are preferred. All fonts converted to curves/outlines.
- Be aware of gradients. Gradients can not be reproduced on any laser engraved product.
- Minimum Line Weight - 1pt (0.0139") | Minimum Font Size - 8 pt
